WORK EXPERIENCE

Google development groups setif

2022- Present

Organizing Events about Google's technology in scientific field.

Projects

You can find the source code for many of my projects on GitHub. Here, I've listed a few key projects along with their GitHub repository links.

secure-ciphers

<https://github.com/Eve-SatOrU/secure-ciphers>

secure ciphers is a collection of encryption algorithms implemented in JavaScript.

Daijin ダイジン

<https://github.com/Eve-SatOrU/Daijin>

This Python project provides a simple file encryption and decryption tool using the cryptography library. It allows you to encrypt files using a generated key and decrypt them back to their original state. The project consists of two scripts: one for encryption and one for decryption.
